Ladder Step Up On The Bend - L18

On this example we have bent the note with the ring finger and whilst retaining the bend added the pinkie to the next fret up. Taking the 4th up a tone then adding the flattened 5th but retaining the bend. Tricky to do but well worth the practice.

```
E|-----|
B|-----|
G|----7>9--7>9+10--7>9-7-5-----|
D|7-7-----|
A|-----|
E|-----|
```

Now try the same thing an octave higher.

```
E|-----10>12--10>12+13--10>12 10-8-----|
B|10-10-----|
G|-----|
D|-----|
A|-----|
E|-----|
```

Homework:

Don't stop at this, you can use this technique all over the fretboard. Try experimenting with other notes and area's along the fretboard.
