Run To You - Bryan Adams - L16

Bryan Adams plays this song with a capo on the second fret, so if you want to play along to the song make sure you move everything up 2 frets! Think as if the intro is an Em, G then G up two more frets. Bryan uses a pick, but you could use your fingers if suites. The lead section has a harmony which is played once with a single guitar, which carries on and then Bryan adds the harmony over the top the 2nd time around.
